Sanjay Ravichandran

Chennai | P: +91 8825592154 | r.sanjayravi22@gmail.com | LinkedIn

EDUCATION

Saveetha College Of Liberal Arts and Science Chennai, India
Bachelor of Computer Science, Artificial Intelligence, CGPA: 7.54/10.
*Relevant Coursework***:** *Internet Programming, Data Structures and Algorithms, Object-Oriented Design, DBMS, OS, Artificial Intelligence, Network Security*

AMM MATRICULATION HIGHER SECONDARY SCHOOL Chennai, India
Class XII, Grade: 84% Jun 2022 - May 2023

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C++, HTML, CSS **Databases**: MySQL, PostgreSQL
Web Tech: ReactJS, NodeJS

INTERNSHIP

Machine Learning Intern | **VCODEZ**, Chennai, India
May 2025 – July 2025

- Successfully completed an internship in **Machine Learning** and gained hands-on experience on **Real-time projects**.
- Completed the project titled **"Resume Classification System"** and was certified that the overall work was **excellent**.
- The **Resume Classification System (RCS)** can be used in **Human Resources (HR)** and **recruitment** to automate the candidate screening process.
- **Technologies -** Python, NumPy, Pandas, Matplotlib, Scikit-learn (ML & text classification).

Full-Stack Developer Intern | Persevex , Chennai, India
September 2025 – November 2025

- Successfully completed a full-stack development internship, gaining hands-on experience in building scalable web applications.
- Contributed to the design and implementation of **Habit Forge**, a gamified habit-tracking platform with secure authentication and engaging UI.
- Developed **RESTful APIs** using **Express.js** and **MongoDB**, ensuring modular and maintainable backend architecture.
- Built responsive React components for login, registration, and dashboard, integrating **Axios** for seamless API communication.
- Focused on gamification features such as streak tracking, XP rewards, and planned animated feedback for premium quests.
- **Technologies** – React, Express.js, MongoDB, Mongoose, Axios, Modular CSS, JWT, bcrypt

PROJECTS

Movie Mania – Movie Ticket Booking Website

- Built a full-stack web application using Flask, SQLite, HTML, CSS, and JavaScript for real-time movie ticket booking and seat selection.
- Implemented dynamic movie listings, showtime selection, and booking confirmation with backend APIs.
- Integrated payment flow and responsive design for seamless desktop and mobile experiences.
- **Technologies** – Flask, SQLite, HTML, CSS, JavaScript, Bootstrap.

Facebook Sentiment Analysis Using ML and NLP Models

- Analysed Facebook sentiment using **Naïve Bayes**, **SVM**, **VADER**, **Text Blob**, and a **hybrid BERT + SVM** model.
- Compared rule-based and machine learning approaches for accuracy, efficiency, and real-time detection.
- Used **Google Colab** for model training and **SPSS Statistics** for performance evaluation and visualization.
- The hybrid BERT + SVM model showed enhanced accuracy, while SVM outperformed rule-based models in most cases.
- Focused on improving sentiment classification through model comparison and hybridization.
- **Technologies**: Python, Google Colab, SPSS, BERT, SVM, Naïve Bayes, VADER, Text Blob, NLP.

COURSES / CERTIFICATIONS

JAVA j2EE – Ficusoft Technologies Pvt.Ltd
Full-Stack Web Development- Udemy

RECOGNITIONS /PARTICIPATIONS

- Presented Paper on Increasing the Precision of Image Classification Using Multiscale Convolutional Neural Nets – **UAE International Conference (ICMRI)** – 2024
- Present poster on Facebook Sentiment Analysis using ML and NLP models – **TECH START SUMMIT** - 2025
